

**ELECTRICAL CONNECTION PROTECTOR KIT AND METHOD FOR
USING THE SAME**

Abstract

A connection protector kit for use with an electrical stub connection includes a flexible cap having first and second opposed ends and an interior wall defining a cavity. The first end is closed and an opening is formed in the second end and
5 communicates with the cavity. A gel is disposed in the cavity. The cavity and the gel are adapted to receive the stub connection. Retaining means may be provided to retain the cap on the connection.
